

HEALTH SCIENCE CURRICULUM ENHANCEMENTS

Provided by the National Consortium for Health Science Education

The documents are designed as resource enhancements, to be used in conjunction with state curriculum resources, plans, and outlines; as well as textbooks and the instructional resources that accompany those textbooks and curriculum materials. The supplements are not designed to “stand alone” but rather to provide resources that complement the instructional tools that teachers are already using.

The content describes and explains essential facts and explanations can be found in textbooks. This supplement is designed to focus on:

- Connections to the National Health Science Standards
- Valuable web site links
- Editable PowerPoints for each standard
- Higher-level instructional activities
- Student-centered instruction with an emphasis on teamwork
- Authentic assessment using checklists, rating scales and rubrics
- Test items aligned to the National Health Science Standards
