### Using Simulations to Engage & Excite Students in Health Science

**Mark Hoffman**  
Senior Product Marketing Manager  
National Geographic Learning/Cengage

**Wednesday, April 28, 2021**  
**4:00 PM ET / 1:00 PM PT**

Digital simulations of health science scenarios are more important than ever with continued social distancing and many students still learning from home. Join us to learn how simulations and digital labs can bridge that divide so students stay actively engaged in real-world scenarios, practice critical health science skills, and gain virtual experiences to help them move forward in their career journey. We will highlight how to effectively use simulations and labs with students in any learning scenario (in-class, at home, hybrid). Examples of simulations will be taken from National Geographic Learning/Cengage Health Science programs.

**Noe Macias**  
Customer Success Consultant  
National Geographic Learning/Cengage

**Mark Hoffman** has been in education for 25 years as a teacher trainer, technology consultant, and curriculum developer. Mark is currently a Product Marketing Manager for Science and Health Science programs at National Geographic Learning/Cengage.

**Noe Macias** has been in educational publishing for 15 years, supporting commercial, marketing and training efforts. Noe is a Customer Success Consultant for National Geographic Learning/Cengage and helps teachers implement digital solutions into their classrooms.
